PROFESSIONAL SUMMARY

Engineering graduate with a strong interest in full-stack development, software systems, and emerging technologies. Through my thesis at Ericsson, I worked with latency analysis in edge-device sensor nodes and cellular network transmission, strengthening my ability to analyze complex technical systems. I bring a curious, problem-solving mindset and a strong motivation to build practical, user-focused technology solutions.

SKILLS

- Problem-solving and critical thinking
- Project management
- Mentoring
- Tutoring
- Collaboration
- Presentation skills

WORK HISTORY

Summer Intern - June, 2026 to Present

Ericsson HQ - Sollentuna, Stockholms län

- Conducted research and evaluation of XR stack components to assess performance, integration, and suitability for project requirements.
- Prepared reports.
- Resolved issues in a timely manner.

Peer Tutor / Study Buddy - March, 2025 to May, 2026

Studybuddy - Stockholms län

- Supported students with subject-specific learning by explaining concepts, answering questions, and helping them improve their study skills.
- Provided one-on-one academic support to students, helping them understand course material and prepare for assignments and exams.
- Assisted students across various subjects by clarifying difficult topics and encouraging effective learning strategies.

EDUCATION

Computer Science - Bachelor of Science - 2026

KTH - Stockholms län

- Conducted degree thesis at Ericsson investigating latency breakdown in edge-device sensor nodes and data transmission over cellular networks.
